Hello reddit! I need some help finding this pokémon, but before I say what it is, let me first give some context: So because me and my friends are so busy with school, we only hang out once a month to keep our friendship alive, and a few days ago we're in my friends apartment and while they're playing split screen Fortnite, I'm on my phone playing PG (an abbreviation I use for Pokémon Go because it's always in conversation) and I say to my friends "Geeh I used an essence and I still can't find anything!" Now, my friends don't play PG, but they know I do, which means there's no way they'd know more than myself, right? Well, here's the advice they gave me: "Why don't you go find the clitoris?" Now, even as a master trainer, this stumped me, and when I asked him what it looked like, he didn't respond, which is quite rude, but hey, that's never stopped me before! After that, I asked him where it could be found, to which he responded "anywhere outside." So I told the guys I'd go looking for it and be back later, but they were so caught up in their game that I guess

they didn't hear me (some people, right?). I spent a half an hour circling the block but only caught some Beldums, Weedles, and even a Bulbasaur! Anywho, when I got back the door was locked and when I knocked nobody came to the door, so I guess everybody went home for the night (it was already 11:45 by then). Trainers, this is my question to you: does anybody know where I can find a PG clitoris? I don't really want to wait another month for me and my friends monthly meet up to ask my buddy for more information on where to find it, because after 2 weeks of searching day and night I haven't found anything! There's always the possibility that my friend was just joking around, but if there's one thing i've learnt from Pokemon, it's that friends don't lie, so please don't comment anything concerning that, serious inquiries only! Thanks!

Trendy Gingerbread Cookie Recipe

“Hi friends!!! It’s Hailey here on the HaileyLifestylz channel!!! SO, today, in this week’s video, we’re going to tackle how to make the perfect, VEGAN gingerbread cookies for your Christmas party. Keep in mind that what I’m about to show you is my nana’s one-of-a-kind way of making gingerbread, so you know they’re good. Anywho, these are sure to impress all your besties and put those jealous, backstabbing ASSHOLES in their place. Let’s jump right into the recipe!!!

Get alllll of these:

- 3 and ½ cups of all-purpose flour**
- 1 tablespoon of ground ginger and cinnamon**
- 1 teaspoon of pure vanilla extract**
- 10 tablespoons of melted margarine**
- ½ teaspoon of N a C l (or “salt” for those not in the know. Just a little joke lol 😊)**
- ¼ cup of mashed up tofu (because cracking an egg is basically an abortion)**
- [Something went wrong, please try reloading the conversation.]**

Combining all the ingredients is pretty easy because you can just dump it all in your mixing bowl at once. It’ll be pretty thick and hard to mix, but this recipe is for the HEALTH BENEFITS so man up you PUSSY. Just keep beating it until it turns gray or until you break your final spoon like I have! The trace bits of wood in the dough is one of many inspired choices.

A little trick I like to use to make kneading go faster is imagining that the dough is my ex’s face. Daryl may have forced the restraining order through court, but he’s finally going to get what’s coming to him. Lay into the dough as much as you want! I know I will! It’s great for stress relief.

Now that our dough's kneaded, we're going to cut out our cute little gingerbread men/women/theys. You can use basically any cookie cutter you want, but I'm still pissed off at Daryl so I'm carving them out by hand. I think keying his car wasn't enough for me. DIE, DARYL, DIE!!! DON'T EVER FUCK WITH ME AGAIN!!!

Haaaaahooooohaaaaahooooo... viola! I got it done in no time at all! If you're wondering why my dough looks a bit moist, a few stray tears may have made it into the dough, but that just means I customized the recipe to have more salt! Look at us being creative! Fill it with any of your bodily fluids! I don't care!

Now, I have a gas oven, but we are NOT going to use it because we're environmentally conscious here. So, of course, there's an alternative!!! I got this amazing kiln off TEMU, #notsponsored hehe (call me though ;)), for like \$15! It basically works the same way as an oven I think? I do know it helped make my stew like the PERFECT consistency and I didn't die! That's one more victory for the environment!

You can power your kiln by plugging it in, but if my electric bill goes up anymore GOD HELP ME I'LL-. I'm using tinder I scavenged up outside as an alternative. Just like Mother Nature intended! We're gonna preheat the kiln to approximately 350 F (that's 499.817 Kelvin for my international girlies). Now all we have to do is drop our cookies in! Hey wait is that smoke-?

So the fire department found me passed out on the floor, almost dead due to smoke exposure, but look at how good the cookies turned out! Talk about a distinct look! The wood chips inside of the cookies seem to have caught fire and resulted in an even more distinct char! You can probably avoid all the hassle I went through by running out of your house the moment you light the kiln. I think you should do so because this is the third time I've had to record this video and the fire department might leave me for dead if I do this again.

Enjoy your cookies! TTYL in next week's video!!!"

What kind of dipshit doesn't give a rubric for assignments, doesn't give a practice exam, and weights the final to be 80 percent of your grade. I've had better electrical engineering lessons from my dog when he ate my homework. At least then I didn't have to reread the abysmal dogshit comments that this complete joke of a professor leaves on my assignments. One time he literally just said "this is wrong." Do you know how much fucking money I'm paying to be here, how I'm PAYING YOU to teach me? You could at least have the decency to give me something resembling constructive feedback, but you'd probably rather just sit on your ass twiddling with your microphone while pretending to know what the slides say since you just stole them from MIT.
